Substrate-entry comparison — development only; previous test substrates excluded
Fixed-budget development comparison
Equal-parent RMSE (log10 temporal ratio)
Training: 6 parents
Development: 3 parents
One rate
One rate + entry
Sequence
Sequence + entry
Sampled + entry
Same objective; stochastic updates retain noise
Training MSE + coefficient penalty
Immediate sequence
Entry: differentiable
Entry: sampled hybrid
Optimizer updates
Effective entry timescale
Mean entry delay (seconds)
One rate + entry
