Training-only observation diagnostics — 6 substrates, unchanged admitted support
A. Measured temporal repeatability
Equal-parent log10-response RMSE
No change
Other biological label
0.986
0.673
0.938
0.620
0.951
0.629
Corrected
Restore baseline same contributors
Before censoring all contributors
B. Shape sensitivity (>0.3 log10)
Equal-parent violation fraction (%)
Growth envelope
Log-concavity
6.46
8.23
5.78
8.11
5.99
8.16
Corrected
Restore baseline same contributors
Before censoring all contributors
C. Reference baseline fraction
Share of equal-parent weight (%)
0–0.25
0.25–0.5
0.5–0.75
0.75–0.9
0.9–0.99
0.99–1
Subtracted baseline / retained pre-subtraction signal
D. Error by reference baseline fraction
Corrected-response RMSE
Previously fitted kinetic model
Other biological label
0–0.25
0.25–0.5
0.5–0.75
0.75–0.9
0.9–0.99
0.99–1
Last bin contains only 3 response observations
