Training-only diagnostic: 6 substrates, 7 conditions; no biological model promotion
Negligible solver improvement
Training log10-ratio RMSE
0.902566
0.883147
0.797339
0.797292
Shared rates regularized
Shared rates no penalty
Free rates log coordinates
Free rates direct coordinates
Rates approach zero boundary
Previous log-rate fit
Direct-rate fit
Fraction of rate groups
log10(rate per hour)
Ratios leave abundance weakly constrained
Cumulative training weight
log10(reference copies per parent)
